

TwinWire

An alternative to large diameter wire or punch plate.

The proprietary "TwinWire" screen

TwinWire excels in high impact — top deck applications.

Unified's new TwinWire screen was designed for high impact top deck applications. Typically used for 1-1/2" openings and larger — this new construction provides greater durability, while maintaining maximum open area. High carbon, stainless steel or Tufflex® wire is recommended and can be made to fit any screening area.

Features:

- Double strand construction both ways or with single/double combined
- Special lock-crimp / flat-top design tooling for maximum tightness and uniformity
- Suggested opening range is 1-1/4" to 8"
- Wire range is 0.244 to 0.625. Wire types available: High Carbon, Tufflex and Type 304 Stainless Steel

Benefits:

- Double wire construction ensures superior tensile strengths and durability for your heavy impact, top deck screening applications
- Guaranteed to outperform single shute in comparable wire size
- Substantially increases open area over punch plate, urethane or rubber products
- Standard lead times of one to two weeks or quicker, depending on your requirements

Customer Research & Applications:

Our field research showed customer needs for a top deck scalping, high-wear screening application. Unified designed an alternative to rubber or punch plate products in order to maintain high through put with a stronger woven wire design.

TwinWire is another new product development by the Unified network as a result of customer research — combining "in-the-field" and design experience with customer needs and requests.

Field Results:

Special tooling has been designed for various wire diameters to ensure uniform openings with a strong lock-crimp construction. Test applications of 3/8" TwinWire have outperformed 1/2" and even 5/8" diameter single wire construction.

Accessories:

- A complete line of screen bolts/J-bolts and clamping rails are in stock for same-day shipping
- Check screen rails/clamping system for wear and tensioning capability
- Rubber/urethane crown bar protectors, protective liners and many other parts and solutions
